

Welcome to Mini Sport

Welcome to the 2019/20 **Edition of the Mini Sport** Catalogue

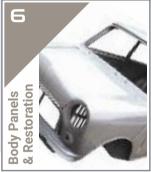

We have 196 pages of the best products currently available for your Mini.

For over 50 years we have supplied quality parts, and supported the Mini community, and this year, for the Mini's 60th birthday, it's no different.

We hope you enjoy it and look forward to seeing you.

Chris Harper Managing Director

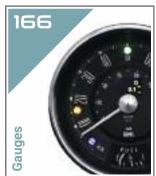

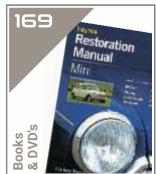

Happy 60th Birthday to the Mini

From A Lancashire Garage To The World:

The Mini Sport Story

Celebrating 60 years of being on the road, the Mini has established itself as a timeless British icon. Originally designed to be an economical runner, nobody really expected the cultural impact that the Mini would have when it first rolled off the production line back in 1959.

The Mini's inclusion in film, television, magazines, even in music of the 1960s sealed its 'cool' image, attracting new generations of enthusiasts in the following decades - even in the face of modern cars. Ultimately though, it is that economical brilliance and the unforgettable driving experience that keeps the Mini at the forefront of people's minds whenever the words 'classic cars' are mentioned.

Taking an interest in this newly designed car back in the day was Brian Harper, who took delivery of one of the first Mk1 850's to roll off the BMC's Longbridge production line.

This purchase would lead Brian to found Mini Sport and through his engineering prowess and great leadership, established it as a world-leading provider and creator of Mini parts.

Here is our story....

The Favourite Car of The 1960s

Most drivers will have a 'favourite type of car' - although any car will give you the same sense of freedom that driving brings, forging a unique relationship with any car you drive is extremely rare.

The Mini quickly became a favourite of many people thanks to its ease of use; responding to the driver's commands effortlessly. Brian and his wife, Heather, would use their Mk1 to go about their everyday tasks (shopping), but after realising the motorsport potential of their nippy runner, they entered events such as auto tests, hill climbs and even circuit racing.

Small, swift and able to get the most out of a petrol tank, the Mini was a natural for auto racing. In 1961, famed racing designer, John Cooper, worked with the Mini's original designer, Alex Issigonis, to create the Mini Cooper - a sportier version that was just as good off-road, than on. Sales of this new model were unprecedented by some members of the BMC's board - one doubted that they would sell 1,000 units. They ended up selling over 125,000.

Spring 1964 saw Brian and Heather purchase a Downton-tuned 997cc Cooper, which they would enter rallies with, each sharing the piloting duties. The competition bug had bitten and soon enough, second-hand Mini parts filled the Harpers' Lancashire garage - and eventually, the family home too. In need of a clear out, Brian advertised in The Motoring News - what he was met with, was an unexpected response that has become so typical of the Mini.

The Mini Sport Story

Innovators From The Start

The overwhelming response that Brian received from that first advert drew his attention to the growing market for everything Mini. Whether people wanted to repair or replace broken-down parts or to improve upon the general operational capabilities of their Minis, they couldn't get enough. This realisation, along with his own love for the marque, led Brian to establish his own business in 1967 - *Mini Sport*. Moving quickly to establish the company as a reliable purveyor of spare parts, it was the innovative qualities of *Mini Sport* that set it apart from the competition. One of the first pioneering modifications for the Mini was born out of the car's throttle linkage, which due to poor design, was difficult to operate and prone to sticking.

Using his astute sense of engineering, Brian created a rigid throttle linkage that was easy to fit and it gave the car a smoother, more progressive acceleration. It very quickly became a best-seller, creating more business for *Mini Sport* and sealing its reputation. In April 1969, *Mini Sport* moved to their first dedicated premises in Padiham, Lancashire.

A Growing Name In Mini Racing

The new facility gave *Mini Sport* the opportunity to expand upon their founders' love of rallying - and help fellow enthusiasts to obtain reliable parts too. Brian's engineering excellence led the way in the creation of Mini parts that would vastly improve the driving experience, making *Mini Sport* the envy of the rally scene as people flocked to Padiham to obtain parts for themselves.

The sheer number of parts that were created led to the production of the first *Mini Sport* tuning catalogue and as business continued to grow, the company acquired another premises nearby their existing one. Catering for customers who needed to take advantage of Brian and Heather's rallying expertise, the extra space allowed for the creation of a 'one-stop shop' for the Mini connoisseur - with accessories, wheels and seats added to the stock lines.

Whilst Brian and Heather had to put their love of rallying competition on hold, as the business grew, Brian returned to competition in 1975, winning the SD34 Shellsport Rally Championship in his 1340cc Cooper S. Such wins helped to grow the *Mini Sport* brand further and with yet more space needed to establish an Engineering Department and dedicated fitting bays (along with the myriad of products that the company stocked), the entire operation was moved to a new base in Padiham, consisting of 20,000sqft of space - a veritable Mecca for marque enthusiasts around the world.

Today - A World Leading Mini Parts & Service Provider

Since the inception of *Mini Sport*, Brian and Heather wanted high-qualities, great value and reliability to be the principles to build their business around - something that continues to this very day.

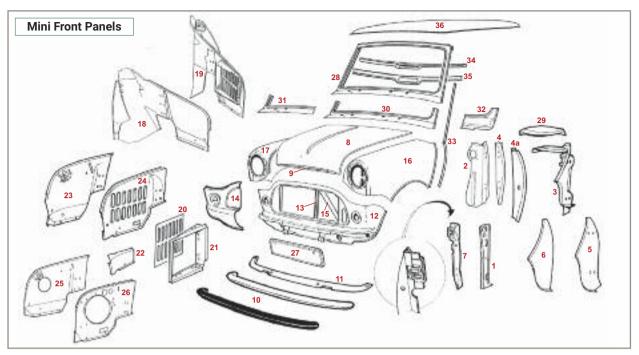

Constant innovation has also been at the heart of the company's philosophy - aside from establishing an online version of our store, giving easy access to Mini parts for customers from across the globe - we have established such on-site facilities as a body refurbishment shop and state-of-the-art spray booth. Through the usage of computer-aided design and acquirement of improved manufacturing technologies, we are constantly pushing the boundaries of automotive design, creating improved parts as a result.

Today, Brian and Heather's three sons, Chris, Daniel and Jonathan run the company with the same principles and passionate outlook that their parents founded and grew the company with. High-quality, great value and reliability - the three same principles that has kept the Mini on the road for over 60 years.

A Family Business: Brian and Heather Harper surrounded by their Family at Mini Sport's Gala Dinner in 2017, celebrating 50 years of Excellence.

Front Suspension, Mountings & Bushes

Rubber Suspension Cones

Direct replacement rubber suspension cones to fit front and rear on all dry suspension Minis from 1959-2001.

This is the original Suspension Cone designed and developed by Dr Alex Moulton in the late 1950's for BMC.

Produced exclusively for Mini Sport by Avon Rubber who manufactured the original cones back in the 1960s, from the original single cavity mould owned by Dr Moulton which he used to make the prototypes.

This product is not only endorsed by Dr Moulton, his knowledge and expertise are very much part of the production methods. You can be safe in the knowledge that you are fitting to your Mini, the most authentic suspension cone available, complete with the guarantee that it has been made in Britain from the exact formula required for the suspension to function correctly.

Beware of other inferior suspension cones also on the market, that claim they are something that they are not.

Suspension Struts & Knuckle Joints

DESIGNED · TESTED
& MANUFACTURED
IN PADIHAM · UK

Competition Suspension Cone

Will fit all dry suspension Mini models from 1959-2001.

The uprated rubber compound makes this a firmer cone and a sharper ride. Used for competition and fast road where reduced body roll is required.

Hydrolastic Suspension Pipes

Suspension Handling Kits

Fully Adjustable Suspension System

DESIGNED · TESTED & MANUFACTURED IN PADIHAM • UK

Easy to fit, improved handling, greater ride comfort and easily adjusted!

'The Ultimate Variable Height Suspension Kit'

Precision engineered from pressure die cast high specification alloy with high tensile plated steel adjustment, ensuring a reliable and extensive service life. Every component having undergone rigorous and extensive testing, both on and off the car. Its unique design enables a quick and easy fit in only four simple steps; Requires no major mechanical skills. Each unit is a direct replacement for the original alloy trumpet and knuckle joint. Easily adjusted without any body modifications, on all dry suspension Minis.

Once fitted (front and rear) the difference is immediately noticeable, the cornering being more controlled and precise, at the same time improving ride comfort to all occupants. Adjustment is simple, requiring only two spanners, enabling quick height correction for varying road uses.

Moulton Smootha Ride Suspension Kit

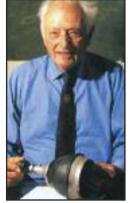

SMOOTHA

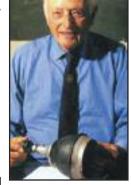

An innovative design developed with the specific purpose to take the harshness out of the Mini suspension, totally transform all dry suspension Minis making a great car more comfortable and easier to drive!

"This Kit will totally transform the ride quality of your Mini! Ideally suited to everyday driving where comfort is a priority

The Rubber Cones were designed by Dr Alex Moulton (the original designer of Minis suspension) who developed, tested and licensed to manufacture Avon VMS for both the front and rear units.

In conjunction with Brian Harper (Mini Sport Chairman) we then created and developed a kit using our Adjusta Ride and Negative Camber and Tracking Rear Brackets, starting a new era in Mini Suspension.

Specially put together by our technicians, combining the best adjustable suspension parts from Mini Sport along with some of the worlds greatest shock absorbers, in one complete kit at unbelievable prices!

PACKAGE INCLUDES - Mini Sport Adjusta Ride Full Kit, Adjustable tie rods, 1.5° Negative camber bottom arms, Negative camber & tracking rear brackets, Poly bushes for both Bottom Arms and Tie Rods, plus a choice of shock absorbers to suit your requirements and pocket.

Performance Handling Suspension Kits

These Performance handling kits have been specially put together by Mini Sport to give you the ultimate Adjustable Suspension. Combining the best height adjustable Mini suspension, Adjusta Ride, together with the worlds leading shock absorbers at a very special price this truly is the Ultimate in performance handling.

Kits include: Adjusta Ride full kit plus a choice of 8 shock absorbers.

GAZ Monotube

A new quality damper to satisfy the needs of the discerning competition and track day enthusiasts. Built from high tensile alloy to withstand the high stresses that are involved in race conditions.

The damper body is hard anodised to give maximum protection against wear during use. Bump and rebound are on the car adjustable by a single adjuster on the rod and the unit is charged with an inert gas via an internal floating piston. PTFE lined sperical bearings are used for the end fittings to give a smooth quiet mounting of the unit.

NOTE: Springs are not included, please purchase seperately. See AVO section for listing

Swivel Hubs & Drive Flanges

Mini Sport Alloy Billet Swivel Hubs DESIGNED · TESTED & MANUFACTURED IN PADIHAM · UK

Designed and developed to be as strong and light as possible by our State of the Art Engineering Department on the latest Cad-Cam computers.

This exceptional piece of design and engineering is an exclusive Mini Sport product, created for Race, Hill Climb & Sprint Cars, where absolutely every gram of

weight which can be lost, is of the utmost importance and top priority. Machined by our very own, latest design CNC machines from 7075 Aircraft specification sluminium billet, then hard anodised to make this swivel hub not only strong and durable but 1kg lighter than the standard cast swivel hub.

Specially designed with 3 bolt steering arm fixings points, and sealed heavy duty ball joints, for extra strength and rigidity.

Standard Cast Swivel Hub WEIGHT, each = 1.73kg Alloy Billet Swivel Hub WEIGHT, each = 0.71kg

Front Alloy Billet Swivel Hubs

FAM2390AKIT Alloy Billet Swivel Hub Kit includes: 2 x Billet Alloy Hubs,

ball joints, 3 bolt Steering Arms, Locating Dowels, plus all fixtures and fittings.

Pair of Handed Alloy Swivel Hubs FAM2390A

FAM2390ABUILT Alloy Front Hub Kit Assembled with Timken Wheel Bearings

Mini Sport Alloy Billet Drive Flanges

This exceptional piece of design and engineering is an exclusive Mini

Sport product, created for competition Mini, where every gram of weight saving is critical. Losing 0.900kg over a standard Drive flange, giving exceptional weight loss from the un-sprung weight on the front of your Mini. Machined on our own CNC machines using 7075 aircraft specification aluminium billet, then hard anodised.

DESIGNED - TESTED & MANUFACTURED IN PADIHAM - UK

21A2695A Drive Flange Alloy Billet, to Suit 8.4" Discs and all Minis Each Drive Flange Alloy Billet, to suit 7.5" Discs, Cooper S 21A1270A

Rear Hubs & Wheel Bearings

To reduce the effects of torque steer, equal length drive shafts are required. When the shafts are the same length torque steer can still occur, but only when the vehicles ride height is different on one side

Designed, developed and precision manufactured by Mini Sport to our exceptional high standards and specification, using only the best

components to produce a kit that is capable of running high powered engines with the reliability required for competition.

This is the ultimate equal length drive shaft kit available and will overcome the problem torque steer in your Mini!

Torque Steer is a term used to describe a condition in which your Mini tends to pull in one direction when engine power is applied quickly to the wheels.

Equal Length Drivshaft Kit - for use with Hardy Spicer type Couplings C-MAD005 Equal Length Drive Shaft Kit, Complete (Requires Hardy Spicer Couplings)

Mini Sport Alloy Billet Rear Hubs

Standard Cast Rear Hub WEIGHT, each = 0.931kg Alloy Billet Rear Hub WEIGHT, each = 0.419kg

TRANEX - Limited Slip Differential (L.S.D)

blocks which sandwich four pins and planet gears. These

sit in the radius between the leading/trailing ramp angles and push the blocks apart increasing the transfer of torque by riding up their respective leading ramps.

17 10745 Tranex Plate Type LSD - for Race, Rally or Hill Climb

QUAIFE - ATB Helical (L.S.D)

The Automatic Torque Biasing LSD enables your Mini to accelerate quicker and corner faster, by putting the power to the ground effectively!

The ATB differential powers both drive wheels under nearly all conditions. It senses which wheel has the better grip, and automatically biases the power to that wheel. It does this smoothly and constantly, without ever completely removing power from the other wheel. In cornering, while accelerating out of a turn, the ATB diff biases greater power to the outside wheel, reducing inside-wheel spin. Allowing the driver to begin accelerating earlier and exiting the corner at a higher speed.

Unlike a conventional plate-style limited slip differential, the Quaife ATB differential relies on gears rather than clutch plates, making it much smoother in operation. The unique design offers maximum traction, improves handling by reducing under steer, curbing steering 'fight' and puts the power where it is needed most, an advantage, whether you are on a Track Day, racing or driving a performance Mini on the road.

QDF36K Mini ATB Helical LSD - Quaife

4 Pinion Differential by Mini Sport

Re-occurring problems with the standard differential especially under competition circumstances prompted us to design and develop the 4 pinion differential. Engineered and crafted from an innovative design in high specification materials to give a very tough and hard wearing component. Highly recommended for all disciplines of motorsport and modified cars. Suit rubber drive coupling, pot joint or Hardy Spicer types.

The 4 pinion differential was designed and developed for the serious fast road and competition driver who requires confidence that the power of their engine is transferred to the wheels without stress related breakages.

Brake Pads, Shoes & Fitting Kits

- 1. Black Stuff A quality OEM replacement pad, made in the UK the Ultimax2™ brake pad is beautifully engineered compound that lasts well, produces minimal dust and is perfect for the daily driver.
- 2. Green Stuff The latest version of Greenstuff brake pads are a deliberately softer compound to improve pedal feel on lighter cars at lower speeds. EBC's medium dust fast road brake pad with 20-25% brake improvement.
- 3. Red Stuff As EBC's flagship street brake pad material for faster Minis, setting new standards in brake performance. EBC's lowest dust, fast road brake pad with 20-25% brake improvement.
- 4. Yellow Stuff Fastest Street, Trackday & Drift racing brake pads High friction formula improves brake effect 30-40%.

BRAKE PADS

Standard - Mintex brake pads are developed and engineered to meet a significant demand for cost-effective braking solutions that deliver the optimum balance between performance and extended service life, by providing quality products at affordable prices.

M1144 - the material for fast road use as well as light competition such as karting, hill climb and single seaterracing cars. Works from cold, and remain stable and consistent through to 450°C

M1155 - for competition use but can be used for normal road if bedded in carefully. M1155 is similar to M1144 but remains consistent to a maximum operating temperature of 550-600°C.

M1166 - Purely competition use only, suitable for rally or racing. The friction level is higher than that of M1155 but remains consistent to temperatures of 700c. No special bedding in procedure is required.

British engineering at its best, Mini Sport are comitted to keeping British manufacturing alive, investing in the very best CNC machines, with extremely talented designers and engineers ensuring the very best products and the very best quality at the best price. These Mini Performance Brake Discs are precision machined in our own CNC machine shop here in Padiham, UK, to aerospace standards, ensuring the very best of British engineering for your Mini.

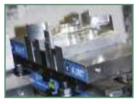

Mini Sport 4 Pot Calipers

Mini Sport 4 Pot Alloy Brake Calipers

- CNC machined from aircraft grade billet aluminium
- Hand built and finished for the best quality
- Rigid design to eliminate flex and give firmer pedal feel
- · Internal Flow Crossover no external pipes
- · High temperature seals for heavy brake usage
- Fully Dust Sealed to protect from brake dust
- · Anodised for looks & protection against corrosion

For over 50 years Mini Sport has been a World Leader in the technology and manufacture of competition and performance components for the Mini.

During these years many of the worlds Mini race, rally and motorsport series have been won using Mini Sport components. With probably best brake calipers available for Minis, Mini Sport can offer the ultimate braking system and in the colour or vour choice.

A superior lightweight high performance caliper (only 1.1kg per pair), produced here in Padiham, Lancashire by Motorsport Advanced Developments (M.A.D.) on our very own CNC Mazak milling machines, ensuring the highest specification and finest tolerances for exceptional reliability and safety.

MSLMS0509-8.4V	8.4" Calipers, Pair - Special	8.4" Vented Discs

7.5" Calipers:

A direct replacement for the standard Cooper S brake calliper used with 7.5" brake discs. Increases braking performance and a touch of style behind your wheels. Perfect for road or competition.

7.9" Vented Calipers:

An engineering masterpiece, designed to fit the biggest brakes possible with 10" wheels (also fits 12" & 13" wheels).

"Ultimate" Mini brakes, specially designed by Mini Sport technical department for use with 8.4" Solid or Vented brake discs, maximising braking performance and cooling characteristics. - 8.4" - fits 8.4" solid type discs, direct replacement for original caliper - 8.4" Vented - fit with 'premium' 8.4" vented type discs

Alloy Caliper Brake Kits & Assemblies

Mini Sport Performance 4 Pot Alloy Caliper Brake Kits

Mini Sport performance 4 Pot Alloy Caliper Kits, designed and developed by our Engineering department, Motorsport Advanced Developments (M.A.D.) to maximise braking performance and increase pedal feel over the standard brake system, all at a price that's right!! Suitable for both road and competition. All kits include a choice of calipers, performance brake discs, brake pads, pad pins and all necessary fittings.

1	MSLMS03	7.5" Cooper S Kit	- Cross Drilled Discs
2	MSLMS01*	7.9" Vented Kit	- Curve Grooved Discs
3	MSLMS05*	8.4" Brake Kit	- Cross Drilled & Curve Grooved Discs
4	MSLMS04*	8.4" Vented Kit	- Curve Grooved Discs

* All curve grooved discs are handed for performance and looks

Mini Sport Performance 4 Pot Alloy Disc Drive Assemblies

Our Mini Sport performance disc drive assemblies are based on the 4 pot alloy caliper brake kits, using all the same parts but built into a complete front hub assembly. This not only makes fitting simple but you are safe in the knowledge that you have brand new components, giving a better service life and reliability.

Each assembly is professionally built in our workshops by one of our trained technicians, using only top quality, brand new parts:
Mini Sport performance 4 pot alloy calipers (choose your colour),
performance brake discs, Mintex brake pads, swivel hubs, ball joints, steering rms, taper roller wheel bearings, CV joints and drive flanges.

Paddy Hopkirk & Cooper Performance Brakes

Paddy Hopkirk 8.4" Mini '84on Calipers

The Paddy Hopkirk ultimate 8.4" Brake Calipers will reduce braking distance when fitted to your Mini. These have been designed as a direct replacement for the standard brake calipers on any Mini or Cooper from 1984-2001, to increase braking and cooling performance. PTFE coated to resist dirt and corrosion. Include EBC Greenstuff Fast Road Brake Pads.

PH33.010 Paddy Hopkirk Alloy Caliper Set for 8.4"

Paddy Hopkirk 8.4" Performance Brake Kit

The Paddy Hopkirk ultimate 8.4" Brake System, designed as a direct replacement for any Mini or Cooper brakes from 1984-2001, to give the ultimate stopping performance. PTFE coated to resist dirt and corrosion.

Kit Includes: Alloy 4 Pot Paddy Hopkirk Brake Calipers, 8.4" Grooved & Vented Brake Discs, EBC Greenstuff Pad Set, Drive Flanges, Stainless Steel Braided front brake line set and Mounting Kit.

8.4" Mini 1984 on Performance Brake Kit

Paddy Hopkirk 7.5" Performance Brake Kit

The Paddy Hopkirk uprated 7.5" Brake System designed as a conversion from 12" to 10" wheels for the ultimate classic looks and famous go-kart handling. PTFE coated to resist dirt and corrosion.

Kit Includes: Alloy 4 Pot Paddy Hopkirk Brake Calipers, Grooved 7.5" Cooper S Brake Discs, Cooper S Drive Flanges, EBC Greenstuff Pad Set, Stainless Steel Braided front brake line set and Mounting Kit.

7.5" Cooper S Performance Brake Kit

Paddy Hopkirk Disc Drive Assemblies

The Paddy Hopkirk disc drive assemblies are based on the brake kits, using all the same parts but built into a complete front hub assembly

Each assembly is professionally built using only top quality, brand new parts:-Paddy Hopkirk Performance brake kit, swivel hubs, ball joints, steering arms, taper roller wheel bearings, CV joints and drive flanges.

Alloy superfins, Rear Hubs & Rear Discs

Mini Sport Performance Alloy Superfin Brake Drums

The Mini Sport Superfin Alloy brake drum, yet another superior quality product from Mini Sport Engineering and Development. A direct replacement to all '84on Mini rear drum brakes with no modifications required. This superior light weight alloy brake drum has been uniquely designed with 25% extra fins for

better cooling efficiency, along with a built in spacer giving extra strength and rigidity, and still weighs 50% less than the original. Pressure die cast and inserted with a steel liner to ensure a constant high quality and reliable product.

Competition Proven with our own championship winning Mini's giving you confidence every time you brake!!

MSLMS0507 Superfins Pair
MSLMS0507KIT Superfins & Backplate Kit

Mini Sport Alloy Billet Rear Hubs

A perfect addition for the ultimate rear drum brake set up, the Mini Sport Alloy rear hubs, created for Race, Hill Climb and Sprint Cars where saving absolutely every gram of weight counts!

A direct replacement to the original hub giving a massive saving of 512grms per side.

KAD Rear Brake Disc Conversion

Combines the hydraulic operation of the foot brake with an effective mechanical handbrake allowing discs to be fitted to both road and competition Minis. The calipers are a single piston sliding type, fully dust sealed and machined from

billet aluminium. The hubs carry a lightweight steel drilled disc are CNC machined from billet aluminium and accept standard taper wheel bearings. The kits are supplied complete with all of the parts to convert from drum to disc brake and use the standard handbrake cables. The kit will fit under 10" wheels and has been designed with both

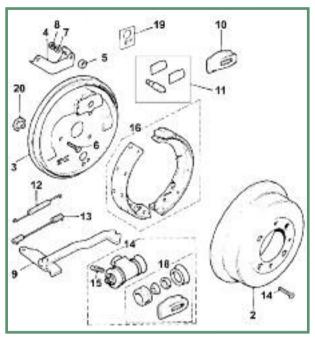

road and competition usage in mind. Weighing in at 2.8kg it is substantially lighter than any alloy drum.

Available in anodised Gold. Red or Blue.

Copper Brake Pipes & Tools

Copper Brake Pipes

A range of top quality brake pipes made specially to length with the correct union ends for your application. Listed below are a range of popular fitments, if you require a specific brake pipe we can make to your exact specification, please call.

NOTE - pipes are not shaped, need to shape when fitting to your Mini.

Legend: - 'M' = Male, 'F' = Female, all pipes have imperial union fittings

	3		3
1	BP10A	254mm (10") Master Cylinder to 3 Way	2 x M

Automec Copper Brake Lines Sets

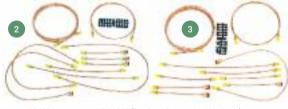

Each pipe is cut to the correct length, fitted with solid brass unions and marked clearly to indicate the correct location on the vehicle (location index included). Metric unions have a nick in the hex for identification. Pipe fitting clips and brass in-line connectors are supplied where appropriate. Each set is assembled with pride to fit your particular vehicle.

Keep everything as clean as possible. Do not overtighten the unions. Secure the pipes properly, to prevent vibration, using the clips supplied to supplement those you already have on the car. When you have fitted all the pipes, filled and bled the system, recheck each union and make sure you have a firm pedal before taking the vehicle onto the road.

Automec pipes, when fitted properly, will probably outlast your car.

Brake Fluid & Aeroquip Hoses

Brake & Clutch Fluid

Castrol React Performance DOT4
For high performance vehicles
and race conditions.
Specifically designed to be a

high temperature alternative to DOT 5.1. fluids.

Castrol React SRF Racing

High performance brake fluid for vehicles under extreme or race conditions.

Castrol Bake Fluid DOT4

Brake fluid for all vehicles requiring a DOT 3 or DOT 4 specification.

(CAS1773	Castrol Standard DOT 4	- 1 Litre
(CAS1704	Castrol React Performance DOT 4	- 1 Litre
(CAS1712	Castrol SRF Racing DOT 4	- 1 Litre

Formula DOT 5.1 is AP Racing's high performance non silicone based brake and clutch fluid.

Formula DOT 5.1 is recommended for use in the hy-

draulic brake and clutch systems of all cars, for which a non petroleum based fluid is specified. Suitable for high performance applications including vehicles fitted with ABS and ESP, is suitable for road and track day use.

CP4510

AP DOT 5.1 High Performance

- 500ml

React

AUTOMEC

Automeo's performance silicone Dot5 Brake Fluid has a high boiling point of 260°C which is maintained throughout the life of the product therefore ensuring consistent, safe performance. Also rust and corrosion are inhibited because moisture is repelled out of the system.

Thanks to this, Automec silicone brake fluid lasts the lifetime of your vehicle, never needing to be changed!

ABF003	Automec Silicone - DOT 5
ABF004	Automec Silicone - DOT 5

- 500ml - 1 Litre

Extra high boiling point (above 310°C) brake fluid, for use in competition braking systems.

Benefits

Enhanced high temperature performance over DOT 4 fluids. Racing Brake Fluid 300

Plus has a dry boiling point of above 310°C in comparison to the 230°C required for standard DOT 4 fluids. Capability to perform at the high braking temperatures found in arduous racing conditions. Robust against water absorption, improving resistance to vapour lock.

MILRACE Millers Racing 300+ DOT 4

Goodridge Brakeline Kits

Improve the performance and feel of your brakes, fit Goodridge stainless steel braided brake lines.

Engine & Gearbox Remanufacturing

Our Remanufacturing Process

Cleaning & Inspection of Parts

All major engine components that are to be used go through an intensive cleaning process, this includes chemical dip, high pressure spray wash system, abrasive cleaning and final rinsing to flush all debris. Each component is then meticulously inspected for wear, stress cracks and damage, and measured for size, ovality, taper and aligment. Any component not meeting specification or tolerances is discarded.

Cylinder Block Remanufacturing

Bolt and stud threads are cleaned. Any damaged threads are replaced. The cylinder blocks are rebored and then honed to give the essential cross hatch micro finish. All gasket surfaces are machine refaced producing the correct surface finish and accurate deck height. New cam bearings, core plugs and oil gallery plugs are then fitted and the block

is painted in the colour of your choice, (British Racing Green, Red, Black or Blue) using special high temperature engine paint.

Crankshaft Remanufacturing

Crankshafts are crack tested, the journals are reground to the next undersize then micro-finished polished to exact tolerances. All surfaces are then re-measured and checked, oil galleries de-burred and thoroughly cleaned. Finally, each crankshaft is dynamically balanced to ensure smooth and efficient running.

Conrod Remanufacturing

All conrod bearing housings are measured for size, ovality and taper, any non-conforming items are discarded. Every conrod is checked for alignment, weight graded into engine sets, then finally balanced.

Camshaft Remanufacturing

Measured for straightness and wear. Cam profiles are reground to original valve timing/lift specifications. Finally being heat treated by a nitrocarburising process, ensuring a long service life.

Cylinder Head Remanufacturing

The cylinder heads are cleaned in an additional process to ensure all old carbon deposits are removed. All valve guides are renewed, valve seats are recut (replaced if required) to ensure correct seating and position. All valves are examined for damage,

head thickness, stem wear and replaced or machined as necessary. Rocker and block faces are surface ground to the correct tolerance. ensuring a perfect seal with the gaskets. Painting process is then completed to the colour of your choice,

Final Assembly

Once all the machining work has been completed and passed, the engine is then assembled by one of our skilled technitions, using all new pistons including rings, crankshaft bearings, thrust washers, timing chain and tensioner (where applicable), oil pump, rocker shaft, pressure release valve and spring, gaskets, oil seals and oil filter.

All new components have been selected for their durability, reliability and are sourced extensively from the original OE manufacturers where ever possible. All O.E torque settings are adhered to during assembly.

Remanufactured Engines & Gearboxes

When an engine has come to the end of it's life and is in need of remanufacturing, it is often the case that the gearbox is in a similar state. The engine and the gearbox in a Mini share the same oil, so it does not make sense to fit a quality remanufactured engine onto an old gearbox, as this will compromise the reliability and reduce the life expectancy of your engine.

In view of this, we have produced full units comprising of a Mini Sport remanufactured engine, a Mini Sport remanufactured gearbox fully built up with new clutch assembly. Produced to the same high standards, these units will guarantee you trouble free motoring, long into the future.

3 Synchro Gearboxes

All types from any of the early remote 3 synchro gearbox Mini's can be remanufactured but due to the shortage of old core it will be necessary to rebuild your own gearbox.

Each gearbox is dismantled and thoroughly cleaned in the latest state of the art environmentally friendly cleaning process. Each component is inspected for wear and damage and all non-conforming parts are discarded and replaced. The gearbox is then re assembled using all new bearings, shafts, and baulk rings. The differential is also fully overhauled including pins, pinions and bearings.

All remanufactured components are supplied on an exchange basis. A surcharge will be levied until serviceable old units are supplied.

Depending on the availability of old core units, we may need your own units to work on.

Engineering Services

SURHEAD5

SURHEAD6

Mini Sport Ltd is one of the world's premier suppliers of A series and A + remanufactured engines and components for Mini. With our advanced and efficient production process, backed by over 50 years of experience, Mini Sport can remanufacture your engine components to the highest quality at extremely competitive prices.

Our range of engineering services available for your own engine components, are as follows:-

Cylinder Block

• Reboring • Honing • Fitting new camshaft Bearings • Surface Grinding

Cylinder Head

- Fit new valve guides Re cut valves and seats Fit valve seat insert
- · Surface Grinding · Pressure testing

Crank Shafts

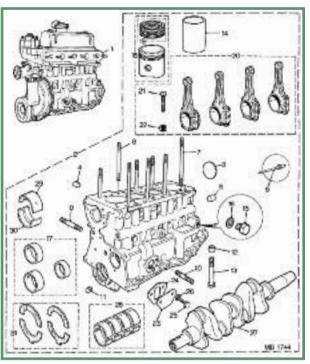

• Regrinding • Wedging • Heat treating

Other Services

- · Dynamic engine balancing · Flywheel lightening and refacing
- Pressure plate refacing Piston machining

Half Engine Kits

Kit includes:

- Reground & Balanced Crankshaft
- Rebored & Cross Hatched Cylinder Block
- Balanced & Reconditioned Con-rods
- NURAL Balanced Pistons Fitted to Rods
- **GLYCO Shell Bearings**

1293cc **Specifications**

Stage 2 Kit

- Fully modified, gas flowed and polished Mini Road (Stage 2) specification cylinder head with 35/29 inlet/exhaust valves.
- Special tuning 948 performance camshaft.
- Reground & balanced Crankshaft.
- Fully reconditioned engine block.
- 9.5:1 Compression Ratio

Stage 3 Kit

- Fully modified, gas flowed and polished Mini Rally (Stage 3) specification cylinder head with 37/29 inlet/exhaust valves.
- Special tuning 544 performance camshaft.
- Reground, nitrocarburised & balanced Crankshaft.
- Fully reconditioned engine block.
- 10:1 Compression Ratio

Stage 4 Kit

- Fully modified, gas flowed and polished Grand Tourer (Stage 4) specification cylinder head with 35/30 inlet/exhaust valves.
- Kent 286 performance camshaft.
- Wedged, reground, nitrocarburised & balanced Crankshaft.
- Vernier timing gear set.
- Fully reconditioned engine block.
- 10:1 Compression Ratio

Power figures quoted are from carburettor models

Short Engine Kits

Kit includes:

- Mini Sport Performance Camshaft
- Reground & Balanced Crankshaft
- Rebored & Cross Hatched Cylinder Block
- Balanced & Reconditioned Con-rods
- NURAL Balanced Pistons Fitted to Rods
- **GLYCO Shell Bearings**
- High Quality Oil Pump
- **Engine Gasket Set**
- Cam Followers
- **Timing Chain**

1380cc Engines & Kits

Full Engine Kits

Kit includes:

- Mini Sport Performance Cylinder Head
- Mini Sport Performance Camshaft
- Reground & Balanced Crankshaft
- Rebored & Cross Hatched Cylinder Block
- Balanced & Reconditioned Con-rods
- NURAL Balanced Pistons fitted to Rods
- GLYCO Shell Bearings
- High Quality Oil Pump
- Complete Gasket Set
- Complete Gasket C
- Cam Followers
- Timing Chain
- Rocker Shaft

1380cc Specifications

Stage 2 Kit

- Fully modified, gas flowed and polished Mini Road (Stage 2) specification cylinder head with 35/29 inlet/exhaust valves.
- · Special tuning 544 performance camshaft.
- Reground & balanced Crankshaft.
- Fully reconditioned engine block.
- 10:1 Compression Ratio

Built Engines

Expertly Built:

 Mini Sport technicians with many years of experience, assemble the engines using all components in engine kits, plus some additional parts for the perfect finished product: Alloy Rocker Cover, Water Pump, Timing Cover and Oil Filter.

Mini Sport Big Bore Engine Kits, comprise of the carefully selected components as illustrated. All components supplied ready for you to assemble yourself, or let our experts do it for you!

The dynamic 1380cc Engines were originally developed in our own Mini's way back in the 1960's. As you would expect, we have continued to develop and improve these engines making them just as popular for today's exciting breed of Classic Mini's.

All remanufactured components are supplied on an exchange basis.

A surcharge will be levied until serviceable old units are supplied. Depending on the availability of old core units, we may need your own units to work on.

Oils & Additives

MILLERS OILS

Classic Mini 20w50

PREMIUM MINERAL based engine oil specifically developed to incorporate EP levels of gear protection for use in combined engine and gearbox applications. Use in installations where the engine and gearbox share the same oil such as original Mini, and gearbox applications specifying an engine oil.

The best possible oil for Mini owners!

Improved gear change quality. Longer gear, bearings, needle/roller bearings & idler gear life in transverse Mini engines.

MIL20/50

20w 50 Classic Oil

5 Litres

Classic Sport 20w50

SEMI SYNTHETIC engine oil for classic performance and sports car engines. Extra high performance engine oil based on highest quality performance additives and shear stable viscosity improvers in synthetic and mineral base.

Suitable for all discerning owners who want the best possible oil for their classic engine.

Maintains high oil pressures. Reduces oil consumption.

MIL20/50C

20w 50 Semi Synthetic Sport Oil

5 Litres

Classic High Performance 20w50

A fully synthetic high performance, low friction engine oil intended for classic high performance vehicles, where this performance level is required on a regular basis. This grade forms part of the award-winning Millers Oils NANODRIVE Low Friction Technology range. Formulated to provide a very high level of protection for classic cars. Reduced friction leads to both power and torque gains, improved fuel economy and a reduction in wear and heat generation.

Castrol Classic XL 20W-50 Oil

For modern classic Minis

A conventional multigrade engine oil of good all round performance, formulated with high quality mineral oils plus selected additives, ideally suited to older technology and classic car engines.

Offers excellent oil consumption and a very high level of engine wear protection.

CAS1925	Castrol Oil - XL20w50	4.5Ltr
CAS1925/7176	Castrol Oil - XL20w50	1 Ltr

Castrol R40 Racing Oil

lubrication. If the best possible performance coupled with reliability is the aim then the remarkable stamina and great film strength of Castrol R40 will provide a valuable margin of safety at ultra high engine speeds and temperatures.

A castor based lubricant which is primarily designed for the racing world; however its unique properties can also benefit private owners interested in high performance.

Never mix Castrol R40 with mineral based or synthetic crankcase oils

CAS1948/5560 Castrol Oil - R40 (1Ltr)

Castrol Greases, Fluids & Merchandise

Castrol

Castrol Specialist Greases

CASTROL RED RUBBER GREASE:

A special, rubber compatible grease, useful in assembly of rubber components for brake, clutch and suspension units.

CASTROL LM GREASE:

Lithium based, high melting point grease, specifically designed as a wheel bearing grease for use over a wide range of temperatures. Also suitable for general purpose applications.

CASTROL MOLY GREASE:

High melting point, lithium based grease containing molybdenum, providing dry lubrication under extreme operating conditions. Ideally suited for the following applications; King pins and bushes, shackles and suspension trunnions, bevel worm and peg steering boxes.

CAS5900	Castrol Red Rubber Grease	500gm
CAS1604/7318	Castrol Multi Purpose High Temp Grease	400gm
CAS1635/8860	Castrol LMX Grease	3 kg
CAS1604/4350	Castrol LMX Grease	12.5kg
CAS1645/7318	Castrol Moly Grease	400gm
CAS1610	Castrol Water Pump Grease	500gm
CAS9098/7318	Castrol Spheerol SX2 Grease	400gm

Castrol Valvemaster & Plus

Lead replacement fuel additive for use with lead-free fuel. Protects engine against valve seat recession under all driving conditions. Keeps fuel system clean and protects against corrosion.

Castrol Valvemaster Plus provides an octane boost to unleaded fuel, reducing pinking, knocking or the need to retune.

One millilitre treats one litre of fuel.

CAS1770	Castrol Valvemaster plus Octane Booster
CAS1768	Castrol Valvemaster Lead Additive

Castrol Brake Fluids

Castrol React Performance DOT4For high performance vehicles

and race conditions.

Specifically designed to be a high temperature alternative to DOT 5.1

temperature alternative to DOT 5.1. fluids.

Castrol React SRF Racing

High performance brake fluid for vehicles under extreme or race conditions.

Castrol Bake Fluid DOT4

Brake fluid for all vehicles requiring a DOT 3 or DOT 4 specification.

Oil Pumps

The oil pump is one of the most important components in any engine, whether a standard or a modified power unit. The top quality range of Mini Sport oil pumps, are manufactured to the highest specifications, ensuring enough oil is supplied at the required pressure, to satisfy the needs of all types of Mini engines and have a longer service life.

Standard Timing Gear Sets

Lightened Duplex Gear Set

Vernier Duplex Timing Gear Set

*NOTE: all sets can be used with original tensioner in A+ engines

Steel Twin Row (Duplex) Timing Gear Set, convert from single row, to give more strength, especially for fast road performance engines.

C-AJJ3323S	Simplex Timing Gear Set
C-AJJ3323T	Duplex Timing Gear Set

A lightened version of the Duplex timing set, designed especially for fast road and light competition. Reduces internal engine weight, therefore allowing the engine to rev faster.

Lightened Duplex Timing Gear Set

The ultimate timing gear set, giving the lightest possible solution with fine timing adjustment. Absolutely essential for perfect timing on all road, rally or race engines. This is the best available!

Remanufactured Cylinder Heads & REBUILT IN PADIHAM · UK **Unleaded** Mini Sport Reconditioned Heads have been produced for many

years to meet popular demand for a high quality, reasonably priced product. Each head is carefully selected and thoroughly checked before being cleaned and any defective parts discarded.

All heads are then refaced and fitted with new "Unleaded" valve seats, new valve guides, new valve stem seals, and new valve springs. Finally each head is tested, inspected and painted, so that when you receive your reconditioned cylinder head you have our "quality assurance"

Rimflo - Highflow Competition Valves

"Rimflo" valves are the best design of high technology valves, giving vastly superior gas flow figures as compared to conventional design valves. e.g. standard size "Rimflo" inlet and exhaust valves give better flow and scavenging than conventional type larger inlet and exhaust valves. Best suited for engines where low and mid range torque is important.

Roller Rockers & Rocker Covers

The Mini Sport Roller tip rockers can be installed in minutes and give the same performance increase as if using a high lift camshaft. This means that you can have all the advantages of changing the camshaft, without having to remove the engine.

The roller tips on the rocker assembly help to eliminate friction, and also stops the side loading of valve stem that the standard rockers create, which allows quieter and smoother running.

giving much more performance and is designed specifically for competition engines. For more information on suitable application, please contact our sales department.

MSLMS0482 1.7:1 Ratio - Rocker Assembly

the original rocker assembly. Not recommended for 850cc engines. For more information on suitable application, please contact our sales department.

MSLMS0480 1.5:1 Ratio - Rocker Assembly

1.3:1 is a standard ratio and is designed as a direct replacement to the original rocker assembly. For more information on suitable application, please contact our sales department.

...Gas Flowed...Polished & Ported...Balanced Chambers

Each cylinder head is expertly hand finished in our workshops

Mini Sport Tuning Kits

Significantly improve every carburettor and injection Mini. All have been developed to achieve significant power increase. improved acceleration, and top speed with better fuel consumption, whilst still maintaining engine reliability.

Stage 1 Tuning Kits

Stage 1 carb kit includes:

- Mini Sport Superflow Exhaust System
- Mini Sport Alloy Water Heated Inlet Manifold.
- Long Centre Branch Exhaust Manifold.
- Mini Sport Performance Airfilter.
- Carb Needle and Uprated Spring.
- All Gaskets and Exhaust Fittings.
- Comprehensive Fitting Instructions.

Stage 1 injection kit includes:

- Mini Sport Superflow Cat Back Exhaust
- Maniflow Injection LCB Exhaust Manifold
- Performance Induction Airfilter Kit
- Manifold Gasket
- NGK Spark Plugs

Stage 1 Half Kit

As stage 1 kit but has no Exhaust System. This allows you to choose your own.

	T/KTK01	850cc, 998cc, 1098cc	HS4 (1 1/2") carb
2	T/KTK01HALF	850cc, 998cc, 1098cc - No Exhaust	HS4 (1 1/2") carb
	T/KTK07	Van, Estate and Pick-up	HS4 (1 1/2") carb
	T/KTK02	1275cc	HS6 (1 3/4") carb
	T/KTK03	1275cc	HIF44 (1 3/4") carb

2	T/KTK03HALF	1275cc - No Exhaust	HIF44 (1 3/4") Carb

	T/KTK012	1275cc MPi (Multi Point Injection)	K&N Air Filter

Stage 2 Tuning Kits

Stage 2 Tuning Kit includes:

- Mini Sport Stage 2 Cylinder Head.
- Mini Sport 1.5:1 Alloy Roller Tip Rockers
- Mini Sport Superflow Exhaust System
- · Mini Sport Alloy Water Heated Inlet Manifold.
- · Long Centre Branch Exhaust Manifold.
- · Mini Sport Performance Airfilter.
- Carb needle and Uprated Spring.
- · All Gaskets and Exhaust Fittings.

30% More Torque

Mini Sport Tuning Kits

John Cooper Tuning Kits

Cooper Tuning Kits for Carburettor Models include:

- · Numbered Stage 3 Modified Cylinder Head
- Roller Tip Rocker Assembly 1.3 on 998 Kit and 1.5 on 1275 Kit
- Twin 11/4 SU Carburettors with **K&N Airfilters**
- Oil Cooler and Pipes (1275 kit)
- Performance LCB Manifold and Twin Box Exhaust System
- Cooper Polished Alloy Rocker Cover and Cap with T-Bar Fittings
- NGK Sparkplugs
- · Gaskets and Fittings
- · Numbered Cooper Conversion Plate and Certificate
- Cooper S Rear Quarter Decals
- Cooper Keyring and Lapel Badge

John Cooper conversions are renown the world over for quality and reliability. All conversions are thoroughly tried and tested and will enhance the Mini Cooper driving experience. Includes Cooper S decals and authenticity chassis plate.

John Cooper 998 Twin Carb 64bhp Conversion John Cooper 1275 Twin Carb 80 bhp Cooper S Plus Pack 90 - 92 MCP1275RD

Cooper Tuning Kits for Injection Models

Cooper Tuning Kits for Injection Models include:

- Numbered Stage 3 Modified Cylinder Head
 - 1.5 Roller Tip Rocker Assembly
- K&N Induction Kit
- · Oil Cooler and Pipes
- Performance LCB Manifold and Twin Box, Twin Tailpipe Exhaust System
- Cooper Polished Alloy Rocker Cover and Cap with T-Bar Fittings
- NGK Sparkplugs
- · Gaskets and Fittings
- Numbered Cooper Conversion Plate and Certificate
- Cooper S Rear Quarter Decals
- Cooper Keyring and Lapel Badge
- S Works Plus kit comes with airbox extention pipe and K&N filter element instead of the induction kit.

John Cooper conversions are renown for quality and reliability. Their conversions are available for all Cooper models from 1992 onwards. All conversions will enhance the Mini Cooper driving experience. An evolution of the "Si" Pack with a boost in power to 82bhp. Includes Cooper S decals and authenticity chassis plate.

Reconditioned Gearbox

Remanufactured Gearbox by Mini Sport

4 Synchro Gearboxes R/G400	Remote Change 850/998/1098/1275
R/G402	Remote Change 1275GT/Cooper S - Close Ratio
R/G403	Rod Change Cooper S - Close Ratio - A Series
R/G405	Rod Change 850/998/1098/1275 A Series
R/G407	Rod Change 850/998/1098/1275 A+
SURGBOX1	Surcharge for Remote Type Gearbox
SURGBOX2	Surcharge for Rod Type Gearbox

3 Synchro Gearboxes

All types from any of the early remote 3 synchro gearbox Mini's can be remanufactured but due to the shortage of old core it will be necessary to rebuild your own

Additional Components when choosing vour Gearbox

Our reconditioned gearboxes are re-built to standard specification. However it is possible to make certain add on modifications, utilising the following components.

C-AHT54	Centre Oil Pickup Pipe
C-AHT54TRAP	Magnetic Oil Pickup Trap
MSLMS0515	4 Pinion Diff - Rubber Drive
MSLMS0516	4 Pinion Diff - Pot Joint

Each gearbox is dismantled and thoroughly cleaned in the latest state of the art environmentally friendly cleaning process. Each component is inspected for wear and damage and all non-conforming parts are discarded and replaced. The gearbox is then re assembled using all new bearings, shafts, and baulk rings. The differential is also fully overhauled including pins, pinions and bearings.

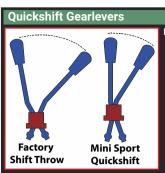

All remanufactured components are supplied on an exchange basis. A surcharge will be levied until serviceable old units are supplied. Depending on the availability of old core units, we may need your own units to work on.

76

Quickshift & Straight Cut Gearbox

Improved feel, shorter gear lever travel and a faster, slicker gear change. Available for both rod type and remote type selector gearboxes, each kit comprises of a modified chrome gear lever, pivot retainer plus all mounting hardware. The Mini Sport Quickshift is easy installation job, which any reasonably competent enthusiast should be able to complete in a matter of 30 minutes.

Gearbox Modifications

Gearbox Gaskets & Sets

	Rod Change Selector Seal Kit
00	Designed to stop the most common oil leak found on a Mini.
	Kit contains a new selector shaft oil seal, internally fitted aluminium bush and seal and new external change rod bellows.
	MSK017 Rod Change Selector Seal Kit

1	AJM804B	Gearbox Set (as Pictured)
2	AHU1959	Oil Seal - Front Main Bearing Cap
3	GUG703038SG	Gasket - Gearbox Casing to Engine Block
4	2A3606	'O' Ring Seal - Gearbox To Block

DESIGNED · TESTED & MANUFACTURED IN PADIHAM · UK

Magnetic Oil Pick up Trap

Designed to fit to the top of the oil pick up pipe in the gearbox just before the oil goes into the engine.

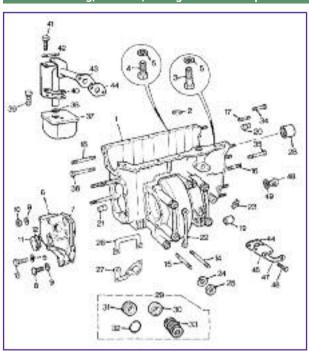

Thus protecting the engine from any metal particles that may be in the oil.

Pre Verto Clutch & Flywheel

Ultralight Steel Flywheels by Mini Sport

A lightened flywheel, reduces the internal weight of your engines components allowing much faster engine acceleration for the same power imput, therefore more power is available for acceleration. Designed and developed by Mini Sport technical department, a range of Ultralite steel flywheels with a choice of differing weights and either Inertia type or Pre engaged type ring gears. All lightened flywheels included the necessary spacer blocks for easy fitment, and include ring gear as shown.

1	C-AEG623	Inertia Type	(4.432kg)

Exhaust Hanger Conversions

Convert your early type exhaust hangers to the later type rubber hangers and rods. These hangers fit on the rear subframe, one on the front edge, the other on the back edge. This kit will be required to fit some performance exhaust systems.

1	MSLPM48	Exhaust Hanger Rod (Late Type), Front Edge	Bolt On
2	MSLPM49	Exhaust Hanger Rod (Late Type), Rear Edge	Bolt On
3	KHU10011	Exhaust Hanger Rod (Late Type), Front Edge	Weld In
4	KHU10012	Exhaust Hanger Rod (Late Type), Rear Edge	Weld In

This clever down-pipe will allow you to fit any 1 3/4" exhaust system, without having to change original standard, single exit cast iron exhaust manifold.

Finishing in same position as a LCB. Ideal for 850/ 998/1100cc engines easy to fit.

2 - Turbo Downpipe

Large 2" down-pipe with stainless steel knuckle joint for fitting to mini using a A-series turbo power unit. ends in same place as LCB.Use 2" exhaust systems.

3 - Carburettor Downpipe

Twin carb down-pipe with sniffer take-off, for fitting to original exhaust manifold when catayst not fitted (1990on), use $1\,3/4"$ or $1\,7/8"$ exhaust system.

4 - Injection Downpipe - SPi & MPi

Twin injection down-pipe, for fitting to original exhaust manifold when catayst not fitted, (late coopers,) simple to fit, use 1 3/4" or 1 7/8" exhaust systems.

Injection Downpipe - SPi & MPi with CAT link pipe

Twin injection down-pipe with link-pipe, for fitting to original exhaust manifold , when retaining the catayst, (late coopers), easy to fit , use cat-back ,1 3/4" or 17/8" exhaust systems.

Carburettor Downpipe - with CAT link pipe

Twin carb down-pipe with link-pipe for fitting to original exhaust manifold, when retaining the catayst (1990+) . easy to fit, use cat-back 17/8" exhaust systems.

1	LDP01	Magic Downpipe	
2	LMD681	Turbo Downpipe	
3	LD068C	Carb Downpipe	
4	LD068I	Injection Downpipe Spi & Mpi	
	LD003I	Injection Downpipe Spi & Mpi with CAT Link Pipe	
	LD003C	Carb Downpipe with CAT Link Pipe	

Catalyst Removal Pipes

Taking out the catalyst removes restriction is causes in the exhaust system, which in turn will increase performance by allowing the engine to breath. A session on our Rolling Road after will tune your engine perfectly.

Exhaust Fitting Kit

Exhaust fitting kit to suit non catalyst models when fitting performance 1 7/8" exhaust systems.

Different size clamps available for larger diameter exhausts.

Exhaust Manifold Wrap - Heat Management

Heat resistant Ashestos Free vermiculite weave exhaust/manifold wrap. Suitable up to 1260°C. Helps to reduce under bonnet temperatures, and protects vulnerable parts from heat damage. Roll Size 2" (50mm) x 50ft (15 metres)

GRAGE980-15

Exhaust Heat Wrap Roll - 50mm x 15m

Welcome to maniflow - a name renowned in the racing world with over 40 years experience producing quality manifoldsand systems.

All our manifolds and systems are manufactured to perfection; special attention is paid to all joints, welds, bends and Y section radii venturi, to create the correct back-pressures and ultimate gas-flow. We will not sacrifice quality for quantity.

of original Downton/ **BMC Special Tuning** Cooper manifold. Ideal for engines up to 1000cc & mild tuned 1275cc engines. Good for low down power. Use 1 3/4" systems

systems

Medium bore LCB with link-pipe for use with catayst, also lamda sensor welded in outside pipes giving extra strength, good torque and spread of

Maniflow original type Downton/ Special Tuning Classic LCB. First choice manifold for many tuners.use 1 3/4" or 1 7/8" systems depending on bhp.

Original type Downton/ Special Tuning classic LCB, that fits to sixties mini with rubber hardy spicer U/J, use 1 3/4" / 1 7/8" exhaust systems

Large-bore LCB, mainly used in competition, But can be ftted to road/street cars, with larger engines eg. 1380/ 1400cc+ use 2" exhaust systems

3 into 1 competition Manifold developed to suit 1275 /1380cc used generally with webers & megaphones. engines gives good mid range to top end power

Maniflow Performance Exhausts

MANIFLOW

Maniflow - the name renowned in the racing world, with over 40 years experience, for producing highest quality Manifolds & Systems.

Craftsmen manufacture all systems and manifolds to "perfection". Special attention is paid to all joints and welds, so the required back pressure and "ultimate" gas flow can be obtained.

Fletcher Stainless Steel Performance Exhausts

Superflow & Sportex Exhausts

giving significant power gains and greater style than the original systems. Made entirely from top quality aluminised mild steel giving a more rounded sound, rapid heat dispersal and greater shock resistance. Each tailpipe is finished in mirror polished 304 stainless steel which gives a long lasting, stylish and clean finish.

1.75" HS6 SU Carburettors

The HS6 Carburettor was never fitted to the Mini but can be used as an upgrade to your existing HS2 or HS4 version. Increases in air volume and fuel leads to increased performance. Recommended for performance engines but can be fitted to the standard 1275cc also.

SU Accessories & Tools

SU Carburettor Needles & Inlet Manifolds

This chart show the best recommendations for standard engines fitted with the carburettor type listed. If you have a modified engine and find that your engine is not running correctly, please contact our sales team who can advise you on the best needle set up. Or book a session on our Rolling Road to achieve the best results, optimised power, performance and efficiency for your Mini.

Rolling Road Tuning for your Mini!

Engine tuning has never been a more scientific process than it is today, with more emphasis being placed on the laptop and the microchip than on the screwdriver and length of tubing. To make the most of the technology available, it is necessary for specialist tuners to run a car under road conditions, to verify how much better an engine is performing as adjustments are made. Of course, the easiest way to do this in a controlled manner is to use a Rolling Road. The Mini Sport PC based chassis dynamometer offers you a simulation of real road-driving conditions in a stationary position. This allows us the facility to check the actual power from the engine and the power at the wheels of your car. At the same time, it is possible to monitor many other parameters of the engine eg. emmisions, oil temp etc.

The microprocessor computer unit uses a graphic and digital display, measuring all parameters to allow our technicians to correctly tune your car to get the optimum power and performance. When the tuning process is complete, the computer prints the final results onto a power diagnostic chart, showing all the measured values of wheel power, engine power, drag power, engine torque, CO, CO2, HC, O2, Lambda, max RPM and max speed.

We are also pleased to tune other cars, please phone to book.

To experience our complete sphere of expertise, book your session on the rollers today and let us help your Mini to achieve its optimum power, performance and efficiency.

Contact us for an appointment and details

Webber Carburettors, Linkages, Manifolds & MPI

Weber Carburettors & Kits

Complete kit includes:- 40 or 45 DCOE carb, performance alloy inlet manifold (2", 4" or 6" length) and linkage kit. Fully built and jetted to your engine specification.

WBB40DC0E	40 DCOE Weber Carburettor
WBB45DC0E	45 DCOE Weber Carburettor
WBBMS2965	Weber 40 DCOE Kit
WBBMS2966	Weber 45 DCOE Kit

Inlet Manifolds

Alloy inlet manifolds to suit Weber carburettors for Mini, available in three lengths 2.5", 4" or 6". Longer inlets produce more performance but modifications are required. (2.5" direct fitment)

3	GMC4040	DCOE Weber 2" Inlet Length	Alloy
	GMC4050-45	DCOE Weber 4" Inlet Length	Alloy
	GMC4030-45	DCOE Weber 6" Inlet Length	Alloy
	GMC4050-45C	Competition 4" DCOE	Manifold
	GMC4030-45C	Competition 6" DCOE	Manifold
4	LI53	Weber DCOE 7" Inlet Length	Maniflow
	LI51R	Weber DCOE 2.75	Maniflow

Weber Service & Linkage Kits

Genuine Weber 38/40/45 DCOE Service Kit contains gaskets, seals, pump jet washers, filter, needle valve (175), 2 mixture screws & float pin. An exploded parts diagram will be included with the kit. Please note that service kits do not include jets, however these are available seperately, please ask for your

requirements.

WBB9300270500	Weber 28/36 DCD	Service Kit
WBB9300150500	Weber 40/45 DCOE	Service Kit

Weber throttle linkage for DCOE/SP range of carburettors, LP 4000 range. It is bottom mounted under the carburettor, supplied with throttle cables & pedal block & full fitting instructions. Most important it containes the male & female balance bar levers for the carburettors

Evans Waterless Engine Coolants

- · Waterless Coolant for Classic car engines fabricated from a mixture of cast iron, copper, steel and aluminium components. Boiling point above 180°C, protects below -40°C, prevents boil-over, improves combustion and maximises BHP. Eliminates egine corrosion and erosion and protects for life.
- · Power Cool protects the same but is suited for performance vehicles and track cars.
- Preparation Fluid is designed to flush the engine before using Waterless Coolants.

Distributors

'The ORIGINAL and still THE BEST' Aldon Performance Distributor for 'A' Series Applications. If you are unsure of the application you require, please contact us first.

Aldon have been successfully modifying distributors for many years. All distributors supplied are based on new Lucas or Bosch units. The modified specifications have been continually developed using dyno facilities. Aldon Performance Distributors are available from stock for 'A' series. All Aldon performance distributors are available with the Aldon 'Ignitor' electronic ignition unit.

Competition 25/45D Distributors

100AR - A non-vacuum distributor, to suit rally and race tuned engines, running on 649, sprint or supersprint type camshafts. Also available for Piper 300/320 or Kent 296/310 type camshafts.

100AR-I - Identical to a 100AR, but with an Aldon 'Ignitor' unit fitted, to replace the standard points system.

100ARS - Identical to the 100AR but fitted with a distributor cap which has the H.T. leads coming out of the side instead of the top

100ARS-I - Identical to a 100ARS, but with an Aldon 'Ignitor' unit fitted, to replace the standard points system.

ALD100AR	Competition - Red - (25/45D)	
ALD100AR-I	Competition - Red - (25/45D)	With Ignitor
ALD100ARS	Competition - Red (45D) Side Exit	
ALD100ARS-I	Competition - Red (45D) Side Exit	With Ignitor

Competition 59D Distributors

100ARP - Uses the same advance characteristics as 100AR but has the later type drive dog to suit 'A' plus blocks.

100ARP-I - Identical to a 100ARP, but with an Aldon 'Ignitor' unit fitted, to replace the standard points system.

100ARPV - A distributor with the same characteristics as the 100AR with the later type drive dog to suit 'A' plus blocks, but fitted with a vacuum advance. (Please contact us with the spec of your engine so we can see if this distributor is suitable)

100ARPV-I - Identical to a 100ARPV, but with an Aldon 'Ignitor' unit fitted, to replace the standard points system.

ALD100ARP	Competition - Red - (59D)	
ALD100ARP-I	Competition - Red - (59D)	With Ignitor

ALD100ARP.S/E	Competition Red (59D)	Side exit
100ARP.S/E	Same as 100ARP but is fitted with Side Exit	Сар

Performance 25/45D Distributors

100AY A non-vacuum distributor, to suit most tuned engines, using camshafts such as Piper 270/285, Kent 266/276 and 286

100AY-I Identical to a 100AY, but with an Aldon 'Ignitor' unit fitted, to replace the standard points system.

100AYS - Identical to the 100AY but fitted with a distributor cap which has the H.T. leads coming out of the side instead of the top

100AYS-I Identical to a 100AYS, but with an Aldon 'Ignitor' unit fitted, to replace the standard points system.

100AYV A distributor with the same characteristics as the 100AY but fitted with a vacuum advance. (As a general rule comp. ratios over 10:1 use 100AY)

100AYV-I - Identical to a 100AYV, but with an Aldon 'Ignitor' unit fitted, to replace the standard points system.

100AYSV - Identical to the 100AYV but fitted with a distributor cap which has the H.T. leads coming out of the side instead of the top.

100AYSV-I - Identical to a 100AYSV, but with an Aldon 'Ignitor' unit fitted, to replace the standard points system.

Aldon Ignitors, Coils & Engine Splash Guard

Ignitors and Flame Thrower Coils

Aldon Electronic Ignitor

A solid state breakerless ignition system, which will give improved fuel economy and maintain an efficient state of tune with no more adjusting of points ever! By eliminating minor tune ups as well as giving a better more accurate spark.

Proven successfully over many years the 'Ignitor' is the ideal choice for the race enthusiast, general road user or collector restoration. It fits entirely under the distributor cap for a neat, clean look. The 'Ignitor' is unaffected by dust, dirt, oil or moisture. It improves fuel mileage, extends spark plug life and helps to eliminate minor tune ups.

LU142 - Aldon Ignitor unit to suit 23D4-25D4 and DM2-40510A, 40743A 4 cylinder Lucas distributors.

Negative earth only.

LU142AP12 - Aldon Ignitor unit to suit 23D4-25D4 and DM2-40510A, 40743A 4 cylinder Lucas distributors.

Positive earth only.

LU143A - Aldon Ignitor unit to suit 43D4/45D4 4 cylinder Lucas distributors, fitted with fixed points.

Negative earth only.

LU143AP12 - Aldon Ignitor to suit Lucas 'Positive' earth 43D4/44D4/ 45D4 4 cylinder distributors with red FIXED points.

Aldon Flame Thrower Coils

The Flame Thrower coil is the perfect coil to go with the Aldon Ignitor. This 40,000 volt coil can benefit virtually any distributor type ignition system The higher voltage allows larger spark plug gaps for added power, smoother response and better economy.

Engine Splash Guard - Weathershield kit

Mini engine weathershield kit, designed to protect the distributor, spark plugs and leads from water splashing through the front grille.

A fantastic product that solves many engine missing problems caused by water in the ignition system. Made from black flexible plastic, very simple to fit, by slipping down the front of the engine between the grille and distributor then simply clip onto the top and bottom brackets.

Kit includes: 2 x Rocker Cover Brackets, 1 x bottom mounting bracket, turn buttons and washers.

Suitable for all Minis except for MPi with the front mounted radiator.

BHM1675 Engine Splash Guard Kit - Includes all Brackets and Fixings.

SMB77 Weather Shield Stainless Mounting Kit

Lucas Type Distributors - Standard or with Electronic Upgrade

Our range of brand new Mini Distiributors 23D4, 25D4, 45D & 59D type distributors are manufactured to the highest standards, available with points or electronic ignition

Electronic upgrade kits are available for your existing distributor, which allows for removal of the points system, giving better reliability and a more consistent spark, please see the list below.

65D Electronic Distributor as fitted to Mini models '84 on, or can be used to upgarde your 59D distributor to electronic ignition.

Alternators & Dynamos

Performance Alternators & Starters

Powerlite Alternators & Dynamos

to bring together modern alternator technology with the classic looks and appearance of a Dynamo. Ideal for both road and competition use the Dynalite provides up to 80% more power and weigh up to 40% less than original dynamo units. Simple wiring on the units affords easy fitment when replacing original equipment alternators or dynamos on a wide range of vehicles.

Powerlite are leading manufacturers and suppliers of high performance rotating electrics for classic, performance, competition and kit cars. From show winning concourse classics to race winning dragsters they have the solutions available.

Powerlite High Torque Starter Motors

Powerlite Starter Motor lightweight units offer increased cranking speeds and more cranking power than original units, whilst drawing less current from the battery. The units are ideal for road competition applications, especially where engines have been tuned and adverse conditions require extra performance from the starter motor. All Powerlite starters are direct replacement for original units and require no modifications to the vehicle on which they are installed.

6	RAC802	High Torque Starter Motor - SLIMLINE Inertia '59-84
7	RAC463	High Torque Starter Motor - Inertia '59-84

Replacement Alternators & Dynamos

A range of top quality direct replacement alternators and dynamos to suit all Mini models. Some units carry a surcharge on the old unit, if you can box your old unit up and send it back to us you will be refunded the original surcharge. This helps us to keep these rare parts available and keep Mini alive!

Dash Mounting Panels & Fixings

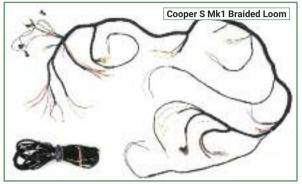

Wiring Harnesses (Looms)

Our wiring harnesses are manufactured in a variety of finishes. We use British Standard 6862 PVC insulated automotive cable where applicable. Once the harnesses are laid they are bound in either PVC harness tape or a cloth braiding depending on your Mini model.

Original Manufacturers colour coding is used where possible; terminals and fittings are supplied where necessary. We go to great lengths to obtain original-type terminals but on older vehicles some wiring accessories may no longer be manufactured. If terminals and fittings are unobtainable we may omit or substitute for a suitable alternative.

The new harnesses are not labelled but will follow the pattern of an original harness. A good tip is to label the old harness up as you take it off. You can then use this as a guide for the replacement. Wiring diagrams are useful to identifying each branch on the harness and location for the wiring in each vehicle, however be aware there can be a few out there for the same vehicle but will say different things. We do not supply a wiring diagram but online we do offer the British Standard Colour code.

Whilst we try to keep as many harnesses as possible in stock some may have to be built. This can be up to 21 days from receipt of payment. Bespoke harnesses are available on request. Please call with your requirements.

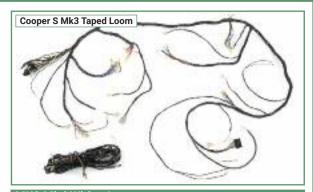

MK1 Mini Wiring Looms

INTERIOR TRIM PANEL KITS - Panel kits include original specification dash, door, rear quarter and rear load area side trim panels, as shown in diagrams. When ordering complete kits you will need to specify which of the two rear window finishers, and which type of rear pocket liner your car requires. It is thought that the pattern changeover between styles was effected sometime around 1973. Please choose A or B - C, D or E.

Mini Saloon 1993 - 1995

Mini Saloons 1993-95

A new style of front seat was introduced in 1993, which was a great improvement in both comfort, design and safety. As can be seen here, the side bolsters on both the base and squab are very modern compared to earlier Mini seats. Additionally, twin post headrests were fitted. The picture here shows a complete interior in Biscuit with our Monte

Carlo door panels fitted. We can of course offer the original Factory designed panels as well. Listed below is a table showing the different colour combinations of door panels available together with different styles of decorative strips on the panels.

Mini Saloon 1996 - 2000

Mini Saloons 1996-2000

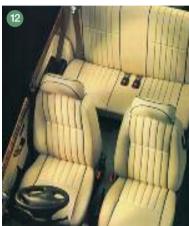

During the mid 1990's, Rover had to upgrade the Mini range in both quality and specification. The front seat frames were modified to cater for a new design of seat covers and the rear seat squab was also altered slightly to take into account the revised seat belt mounting on the rear parcel shelf.

We are offering the two most popular designs of that period, both with leather seat facings. Style One has the horizontal flute lines whereas Style Two has vertical flutes.

You can choose all one colour or have a different coloured centre section. Contrasting piping colours are also available upon request. We have the original Rover door and rear quarter panel tooling so you can have completely original panels as well.

Carpets, Mats & Insulation

Moulded Carpet Sets

The same floor pan was used on all cars until British Leyland changed the gearbox mechanism to a rod change system in 1973. Until then the front floor pan had a rounded centre tunnel with a bulge on the right hand side. On very early Minis this bulge held the floor mounted starter, button. The carpets are designed to fit both LHD and RHD cars and have markings underneath to denote positions of the steering wheel. Full fitting instructions are included. The Traveller rear luggage compartment carpet sets are sold separately.

Special Moulded Carpet to allow perfect fitment

Our sets for the Traveller, Van & Pickup have moulded front carpets, but not a moulded rear section as the saloons do. All these sets will fit both LHD and RHD cars. Floor fixing clips and full fitting instructions are included with each kit.

Colours Available

Black **Biscuit** Grey Green Powder Blue Red

Mat Sets

These heavy duty nylon carpet mats are backed with a non slip rubber backing. They are designed to fit exactly into the front footwells and the rear set will allow the seat frame to rest on the original plastic slide in the rear area.

- · Available in Black & Grey.
- · Available as 2 or 4 piece sets.
- · Black binding as standard.
- · Contrasting binding also available in Blue, Grey and Red upon request.

Saloon Battery Strap

Van and Pick Up Battery Cover and Strap Kit

Spare Wheel Cover

NCMPT3011

NCMPT3013

These covers are made from strong Black PVC coated felt known as Hardura and manufactured to fit both standard and larger tyres.

NCMCK902

Spare Wheel Covers For Both 10" & 12"

Boot Lid Board

These black boot lid boards were fitted originally to MK.I cars in the 1960 period, but have proved very popular since as an accessory. The board is held in place with screws and cupwashers which are provided and will protect the paintwork and will probably give extra sound insulation.

NCMPT3008 Boot Lid Board

Boot Boards

Our carpeted boot boards are made from carpet covered plywood with sewn vinyl edging which is turned and stapled to the underside of the board. These were fitted only to Mk I and Mk II Mini Coopers from 1964 to 1970. We have developed others for later models together with a special bracket kit.

For early models we also offer a carpet only for you to fit yourself.

COLOURS AVAILABLE

Sunvisors & Brackets

This sunvisor is relatively simple, held in place by a single chromed bracket. Early cars had a light grey material, whereas later cars had the Cream Crackle material.

This pad was much larger and more padded and has included a chromed swivel bracket at one end and a plastic peg at the other. The material is usually Cream Crackle.

Cream

White

Colours Available

Black Cream Grey White

This style of pad was used right up to the end of Mini production in 2000.

Cars built between 1966-70 had the Cream Crackle material, after that Light Grey was used for many years. Late cars had a White headlining with pads that had white on one side & black on the other.

Monte Carlo Trim Sets

Monte Carlo Trim Panels 1973 - 2000 Mini & Clubman Models

This 12 piece kit includes a pair of speedo surround panels, a dash tray liner, pairs of door and rear quarter panels, rear pocket liners, wheel arch covers and a rear parcel shelf liner. These two kits are suitable for cars fitted with the central round or oval style instrument cluster.

Oval consoles have three dials, where as the round console has only a speedometer fitted.

The Monte Carlo trim panel kits were developed to fit Paddy Hopkirk's Mini Cooper S in 1994 when he celebrated his 30 year anniversary of his win on this famous Rally.

The design is based on the 1960's Mini Cooper interior, but have adapted this design to fit the later trim panels. Various colours are available, as listed below. These kits fit 1973-2000 Minis.

A new range of seat covers to fit the mid 70's to late 80's range of minis that will complement out monte-carlo trim panel kits. These are front and rear seat cover sets

Headrests

In 1982 headrests were introduced with a single stalk. In 1993 a twin post unit was introduced and then in 1996 a similar unit was introduced with a different frame where the stalks are only 7" apart.

4	NCMHR3060	Single Stalk	1982 - '92

Classic Seat Covering Kits

The seat kit includes all front and rear covers, front seat foam kit, diaphragms & seat clips. The rear seat foams can normally be reused, but new ones are available if necessary. From 1973-92 there were three front seat frame designs, so listed below are the types for each period. (Initially the early frames did not recline, then they did recline and finally they reclined and had headrests). Each seat kit has a set of fitting instructions. Listed below is a range of colours available as standard, but we can offer different colour options to suit you.

Suffolk Reclining Seats

Primarily aimed at pre-1993 cars but suitable for all minis where the original seats have become worn or damaged beyond safe repair. Utilising a fully adjustable modern reclining mechanism and twin post, height adjustable head restraints, the seats also feature 6" (150mm) front to back travel on the seat slides. The subframe was designed to have the same floor footprint as a factory seat. The anti-tilt mechanism is a standard feature of the subframe.

Special Mini Accessories

Tool Bag & Jack Bags

These useful items for storing tools and the jack in the boot are made from very strong PVC with a brown felt backing known as "Hardura". The tool bag has various sized stitched pockets for the tools. These bags were originally designed for the MGA in the 1950's, so being authentic BMC items, we thought they would suit the Mini as well!

COBRA Suzuka Seats

Still the preferred choice of many in all forms of motorsport, an incredibly safe, rigid and deep sided seat for positive driver location, whilst allowing freedom of movement required. High backed with fully Hans compatible headpad area, the Suzuka allows the driver to really get over the wheel and feel full control of the car with no compromise in maintaining a perfect driving position. Allied with Cobra's breathable, cooling Spacer fabric and it's understandable why this is regarded as one of the most comfortable seats in the industry.

Steering Wheels & Accessories

Moto-Lita

The Moto-Lita Thruxton workshop has been home to a close-knit family of craftsmen since the late 50's. The quality of their products they make lead them to being original equipment suppliers to the world's most highly regarded car makers, as well as making Moto-Lita the wheel of choice for thousands of enthusiasts.

Because they're so well known and respected in the UK, many people are surprised to learn that Moto-Lita steering wheels have been exported to almost every country in the developed world since the '60s. Yet, despite the great success and massive market, they remain loyal to the simple founding objective: we make high-quality steering wheels, by hand.

12" & 13" Moto-Lita Steering Wheels

Rally Instruments - Gauge Pilot

Making regularity competition a pleasure

GaugePilot might look like a traditional tripmeter but it's the ultimate in legal rally equipment.

With the styling of a classic 1950's tripmeter, GaugePilot is an easy-to-use multifunctional Rally instrument with unique engine data and warning applications, giving today's competitor added confidence to succeed in any rally event.

Proven during the last three years in the world's premier classic rallies, including the Rallye Monte-Carlo Historique, Mille Miglia, Targa Florio, Le Carrera PanAmericana, the Peking to Paris, Trans America Challenge, and many more.

With three rally models to choose from, GaugePilot can make the difference at any level of competition. The instrument is manufactured with quality at the forefront. A bespoke aluminium case, colour high-resolution graphics viewed through a reflection reducing lens, a range of versatile applications easily selected via three period-style control knobs are some of its unique features.

The GaugePilot Classic is a new engine protection, monitoring and care system for your classic car.

A focused rally tripmeter with basic engine monitoring - the Clubman is the entry point of our Competition range of instruments.

Packed full of Rally tools - the Rally is the mid point of our competition range of instruments

Gauge 10 0 0 GaugePilot can display up to 24 different gauges using a mixture of directly and indirectly connected sensors. Choose from a range of Temperature Gauges, Pressure Gauges, Speedometer, Rev Counter, Air Fuel Ratio, and more.

Datalogger 0 2 0
GaugePilot data-logging takes the guess work out of what is happening under the bonnet, putting 281 channel hours of recording across 32 channels at your fingertips.

SpeedPilot 234

A digital recreation of the original 1950's mechanical average speed computer - track your progress using the precision of the GaugePilot Rally Engine™ with the classic style of the original Halda SpeedPilot.

RallyMaster • • • To primarily reduce the stresses in rallies which feature precise (speeds to 2-decimal places) average-speed sections, RallyMaster provides the driver and navigator with a clear and easy to follow needle indicator of performance against target average speed.

mechanical rally instrument of the same name from the 50's,60's and 70's in the topflight of world rallying. The clear and simple to read rolling odometers capture the watch-like motion of the classic instrument.

Calibration 0 0 0 You can change between Miles and KM as your distance units and your unit will remain calibrated. No need to change gears or change your calibration value between events using Miles and events using KM - just tell the unit which units you are using and it does the rest.

Twin Stopwatches

Accurate to 1/8 of a second, each stopwatch can be started, stopped, held for an interval time and easily reset via the 3 beautifully tactile GaugePilot control knobs.

Farina 0

Make complex events such as the Mille Miglia less stressful and improve your results with Farina, an advanced table-driven rally computer available only on the GaugePilot Rally Pro with separate driver display.

Service 0 2 4

The systems monitors the Mileage, date and hours run since service on 16 key items alerting the owner to when action is required. You have total control on the settings allowing to manage the vehicles maintenance in a controlled way.

TwinTime 0 4

A new paradigm in rally computer for regularity and jogularity events, TwinTime delivers twin odometers, rally time, and a rally time synchronised stopwatch in a clear and simple to view format, removing the need for multiple devices across the dashboard.

RKS MINI PARTS

The BMCs Abingdon based competition department created each of the 71 Works Mini Cooper S with the utmost attention to detail, leaving nothing unconsidered. The parts in this range are made using the exact same methods that the British Motor Corporation used when creating the originals at Abingdon, with the majority being hand-made with authenticity being considered of upmost importance.

The same materials used in the 60s have been used today to produce these parts, with hand stitching, welding or precision machining being used where needed. These parts cannot be closer to the originals and are perfect replicas. For all those Works admirers and Replica builders, this range of products is a must!

These brackets and paddings etc. all played their part, no matter how small, in taking the Mini rally team to 3 famous wins in Monte Carlo and many other events around the world, forever linking the Mini to the world of motor sport.

Auxillary Lamp Covers

Auxillary lamp covers are of the highest quality and made precisely to the original specification. Made from vinyl and beautifully hand stitched with an authentic wool lining to give added protection. Abingdon could hardly have made them better themselves, these are a work of art on their own the attention to detail and authenticity is exquisite.

WRRP007W/B	Lamp Cover 7"	White/Black
WRRP005W/R	Lamp Cover 7"	White/Red

Headlamp Covers (Protectors)

Headlamp covers were often fitted to the Works Minis in the 60's to prevent headlamp breakages, chips and cracks and have become synoymous with the Classic Works Mini look. These are manufactured to original specifications using highest quality formed perspex cover with leather straps and stainless steel fixings.

> WRRP003BI Headlamp Cover with Black Straps WRRP003R Headlamp Cover with Red Straps

Works Reversing Lamp

These Lucas reproduction of the original 'Works' mini reversing lamps are 5 3/4'

(146mm) in diameter just as the originals were. Although the Rally team would ideally not be having to reverse, they were essential for getting the Minis out of trouble on the dark, night stages.

WFT576-L

Lucas Works Reversing Lamp

Works Mini Parts

Caliper/Hose Protector Brackets

Designed for rough Rallies where protection of the front Calipers and Brakes from rocks and other road debris was essential. Made from heavy duty steel and designed to take a beating.

Steering Wheel Boss Kit

Mini Sport have manufactured this boss kit to be an exact reproduction of the original used on the works Minis. Made with aircraft grade aluminium and precisely machined.

C-AJJBOSS

Moto-Lita Steering Wheel Boss Kit

Works Crackle Black Dashboard

The Works Dashboard is as near to original specification as possible, made from steel and coated in crackle black, just as the originals were.

These dash pieces are exact to size and will fit the many Works Mini instruments.

AJJ3330	Works Dashboard RHD
AJJ3331	Works Dashboard LHD

Headlamp Washer Kit

Mini headlight washer jet kit as used on the Works Minis. Includes black nozzles and piping to connect into the screen wash system.

WRRP034

Headlamp Washer Kit

Navigator Foot Operation Horn Switch

This Works specification, Navigators Foot Operated Horn Button, as fitted on the bulkhead of most Works Minis, is in easy reach of the navigator, which they could operate allowing the driver to concentrate on driving. They are made from Hardwood with a hard wearing aluminium face that is securely screwed to the front to ensure durability.

Works Mini Parts

Works Bonnet Strap

The Leather Straps used to ensure the bonnet stayed shut have become synonymous with the classic rally car look although they were not there just for looks. The strong Leather Straps were built for toughness and ensured the bonnet stayed shut no matter what was thrown at them.

AJJ3381

Genuine Leather Bonnet Strap

BMC & Special Tuning Rosettes

BMC and Special Tuning Rosettes were often placed on the front wings of the Works Minis, sometimes accompanied by the rally teams name too. So just in case anyone was in doubt that it was a Works Mini powering past them, all they had to do was look for the British Motor Corporation famous rosettes!

Door Pocket Switch Plates

Door pocket switch plates, fit directly into the MK1 door pockets allowing extra switches to be mounted within reach of both driver and co driver. These parts are direct reproductions of the original works parts and finished in crackled black

WRRP030

Door Pocket Switch Plates - Alloy

Pair

Fuse Box Holders

Aluminium fuse box holders to original specifications and finished with black crinckle. These are available in three designs, to mount either 2, 3 or 4 Lucas type 6FJ fuse boxes.

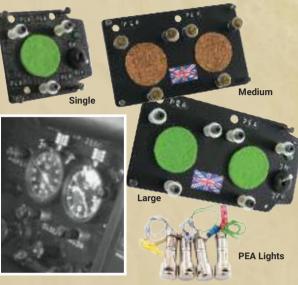

WRRP031	2 Fuse Box Holder - Suit Lucas 6FJ	Black Crinkle
WRRP032	3 Fuse Box Holder - Suit Lucas 6FJ	Black Crinkle
WRRP033	4 Fuse Box Holder - Suit Lucas 6FJ	Black Crinkle

Aluminium Stopwatch Holding Panels

The Classic Works Mini had everything a Rally car needed, complete with all the gadgets that the navigator needed. The Heuer stop watches, set in the dash were essential for the navigator and precision map reading.

These Crackle Black, Aluminium Stopwatch Backing Plates are made to the exact spec as the originals, ready and awaiting the clocks.

Wheels & Accessories

Cooper S Steel Wheels 3.5" x 10" or 4.5" x 10"

When the Cooper S first came off the production line, it was fitted with 3.5" x 10" wheels as standard with 4.5" x 10" wheels available as a factory fitted option.

Mini Sport have now painstakingly reproduced the 3.5" and 4.5" x 10" wheels to original specifications, perfecting the characteristics even down to the unique Old English White and Silver colours. These wheels are NOT cheap copies, they are exact replicas of the original design and would be perfect for any restoration project.

YOKOHAMA

YOKOHAMA is a Japanese producer of high performance tyres, for your Mini. Established in 1917, YOKOHAMA is the oldest tyre manufacturer in Japan. Producing over 50 million units each year, YOKOHAMA is an acknowledged leader in high performance tyres. Having enjoyed an affiliatinon with motorsport since 1982 and currently being the Official Tyre supplier to the FIA World Touring Car Championship and BRDC Formula 4, their pedigree goes without question.

A008 Performance Road Tyre

- Performance tyre specifically developed for the drivers of classic Austin 7, Mini 850 and Mini Cooper cars.
- Enhanced performance in dry
- Hydroplaning resistance and wet traction
- Features a polyester cord body and twin steel belts reinforced by a layer of nylon to help deliver exceptional dry traction and predictable handling.
- The A008 features a high performance tread compound molded into an asymmetric

YOK1657010A008

A008 -165/70/10

- Low Noise, Enhanced Comfort. Delivers the performance of a leading sports tyre with the minimum of noise.
- Miles better for user satisfaction. Tough and durable, offering longer-lasting superior performance.
- The asymmetrical tread pattern offers outstanding stability when cornering.

YOK1656012A539 A539 - 165/60/12 YOK1755013A539 A539 - 175/50/13

A048 Competition ONLY Tyre

- Designed to deliver precise control, predictable grip and sure footed braking.
- Tread designed to increases the tyres footprint and increases tread stiffness, enhancing 'feel', steering response and cornering stability.
- Moulded with a tread depth of 4.76mm, ideal for damp tracks
- Twin steel belts that are reinforced with nylon, placed over a rounded case design, allowing predictable handling transitions between straight line and cornering.

Competition ONLY

YOK1655512A048R YOK1755013A048RM A048R 165/55/12

A048R 175/50/13 - Medium

A032 Competition Tyre

- Symmetrical, directional tread with huge tread blocks helping to optimise the contact patch across the tyre, increasing grip and enhance water evacuation to develop wet traction during wet competition conditions.
- High density bead filler to improve the tyres 'feel' for more precise steering input.
- Moulded with a shallow tread depth design (4.76mm) providing minimal tread distortion and high cornering
- Twin steel belts reinforced with nylon, adding strength to the sidewall to improve road handling and high speed stability.

YOK1657010A032RS

A032 165/70/10

Falken ZE-914 Ecorun

Asymmetric pattern with 4 wide circumferential grooves making it incredibly stable at speed, and under heavy braking. New lateral groove design significantly improves water displacement, also more surface area results in higher load handling when cornering.

FAL1656012ZE914 FAL145/70R12

ZE 914 Ecorun Tyre SN828 145/70 R12

Falken FK-07E

New directional tread designed especially for sports drivers. The FK-07 packs a real sports punch, with exceptional wet weather performance. Combined with low noise levels and great looks, making this a High Specification Sports Tyre.

FAL165/70HR10 FAI 145X10

FK-07E 165/70 R10 SN807 145/80 R10

Performance. Winter & Classic Radial Tyres

Max Sport Hakka

The MSA Approved. Maxsport Hakka are a popular off road racing tyre. This self cleaning tread pattern gives excellent traction in all conditions especially snow, grass & loose soil.

TYRMAX145/70R10HAKG Hakka Offroad 145/70 R10

MaxSport RB1

The Maxsport RB1 tyre has an open and aggresive tread pattern, ideal for all round conditions, especially forest stages and grass.

Available in two compounds: Soft and Medium

TYRMAX145/70R12RB1R

RB1 Med 145/70 R12

EU Tyre Labelling

Same style as the current energy efficiency labels with a familiar A -G grading system.

Fuel Efficiency

from G to A (least efficient most efficient)

Wet Grip

from G to A (longest braking distances to shortest braking distances)

Noise Level

From 1 to 3 Waves (noise level between the new lower limit and the current max)

Nankang AS1

NANKANG

Groove pattern designed to accumulate and divert water for a safer drive. A high rigidity tread pattern strengthens cornering force and enhances steering ability. The straight groove design on the shoulder improves rigidity and prevents irregular wear.

TYRNAN175/50R13 13" - AS1 175/50 R13 Tyre

Nankang CX668

NANKANG

4 Groove designed pattern enhances drainage with dual double grooves on the shoulder to divert and balance force thus preventing uneven wear. Thinner sipes on the shoulder reduce noise generation and a small block pattern design helps to provide

TYRNAN14570R12 12" - CX668 145/70 R12 Tyre

Nankang Winter Tyre

NANKANG

The SV-3 combines a /-shaped four-groove design, a 3D solid sipe design and a solid groove wall design Tyre design increases friction thus shortening brake distances in the wet, and enhances maneuverability, cornering ability and grip on icy roads

TYRNAN14570R12SV2

Winter SV-3

Complete range of original style tyres from a variety of manufacturers, to give your Mini that original early look!

All tyres are made to fit the original 10" wheel, as you would expect, with a choice of two widths, either 145 or 165.

Commitment to Customer Care

Customer care, we believe is the key to success. Our family run business with 50 years experience, is based on traditional values, such as Quality, Reliability, Customer Service and Value for Money. That's why we offer the highest levels of personal service, easy ordering, next day deliveries and no quibble guarantees. We do not measure our success purely by profit, but by the increasing number of satisfied customers around the world.

Our customers are our number one priority.

After Sales Service & Technical Support

When it comes to after sales service, we have no favoured customers; everyone receives the same standard - the best! As technology becomes more and more sophisticated, the standard of service you receive is as important as the quality of the product itself. We've developed an enviable reputation for the quality of products and services we supply, so it's only natural that we should offer an outstanding standard of back up service.

Quality Products at Value Prices

At Mini Sport we are committed to Quality and Value. With the aid of the latest computer technology, state of the art machinery, and the ongoing development of the skills of the company personnel, the basis of the Mini Sport challenge is to ensure top quality at the right price!

Quoting for your Requirements

We are always pleased to provide quotations for all your requirements and also make recommendations to offer the very best solution within your budget. We're committed to offering customers exceptional value, backed by sound advice.

Trade Overseas & UK Sales Tax - V.A.T

The current rate of VAT is 20% and will be charged on all products except for books, magazines and manuals, when purchased from any EU country unless a VAT exemption code is provided. Customers ordering goods which are to be dispatched outside the EU will NOT pay UK current VAT i.e. Far East, Asia, Africa, North/ South America and Australasia.

Customers ordering goods which are to be dispatched inside the EU will be charged UK current VAT, unless they are ordering from a business registered for VAT within the E.E.C. and the order is placed clearly stating the registered VAT number. Mini Sport Limited VAT Registration No. GB 175 5483 36

BFPO & US Forces Customers

We can supply BFPO and US Forces customers VAT free, providing a Certificate of Entitlement for VAT zero purchases, authorised by your CO, is supplied.

On any non stock special order item, we reserve the right to charge a deposit of £100 or 25% of order value to the customers credit/debit card which is non refundable in the event of cancellation, based upon the customers implicit instructions to order the goods on their behalf.

Buy with Confidence

Great care has been taken to ensure that all details and descriptions are correct at the time of going to print. Unfortunately due to circumstances beyond our control we sometimes have to make changes (not always for the worse) without prior notice.

Great care is taken in stating the correct specification for every product in this catalogue, due to changing of manufacturing procedure or change of suppliers, some items may vary slightly from the product described or photograph. We reserve

To give you the very best possible products and services available we are constantly working very closely with our suppliers and actively encouraging them to improve the quality and update the specification of their ranges.

the right to alter technical descriptions and specifications at any time.

Our warehouse carries a huge range of products, enableing us to supply most parts very quickly. Sometimes parts do need to be ordered, but we will advise you of approximate delivery times when your order is placed. We are constantly striving to better our service and make sure that every customer is completely satisfied with every aspect or their ordering experience.

When placing an order, please help us to offer you the most efficient service by clearly stating part numbers if known, vehicle model and year, engine size plus any other vital information that will help with the correct identification of the parts required.

After Sales Care

We want you to be totally satisfied with every purchase. If you return an item in it's original, unused condition and in its undamaged packaging, along with the receipt, to our store within 7 days of purchase we will exchange it or offer a full refund. If the original packaging is damaged, we reserve the right to charge for the replacement packaging, which will be deducted from any refund due.

If a product develops a manufacturing fault within the first 30 days we will offer the same refund or exchange policy as above. If a product develops a manufacturing fault after 30 days and within the manufacturers guarantee, a new product will be sent out immediately and charged for. A refund will be issued once the faulty product has been returned to ourselves and assessed. In certain circumstances the manufacturer could require to inspect the product hefore a refund is issued

Returns & Shortages

Goods which prove unsuitable may be returned for a refund, credit note or exchange if they are returned to ourselves within 7 days of receipt. Subject to the following conditions:

- · Items are returned carriage paid.
- · Items received are in a re-saleable condition.
- · Items should be returned unused in their original condition in order to secure
- Items are returned complete with all packaging in good condition. (We reserve the right to charge for replacement packaging when the original has been damaged or defaced).
- Items returned after 7 days from receipt may be subject to a restocking fee. (This does not affect you statutory rights).
- We cannot accept any items which have been specially ordered for you or manufactured to your specification for return.
- All returns are to be accompanied by the senders name and address, account number and reason for return. Remember, the information you provide will help
- We cannot accept responsibility for returned parcels which are undelivered or lost, please keep your proof of postage, as it may be required in the event of a claim with your couriers.
- Mini Sport Ltd are not responsible for any labour charges incurred during fitment or removal of allegedly faulty (or incorrectly supplied) parts.
- Old units returned for a surcharge refund, must be returned within 90 days of purchase, in a clean serviceable condition.
- All returns must be accompanied by a returns authorisation number. Failure to do so may delay the processing of any refund or replacement. (Authorisation numbers can be obtained by contacting our returns department).
